

Superhero Products

The latest trend from America could be all you've ever wanted – as long as you don't think about it too much reveals **Beatrice Aidin**

Roll out the red carpet for the all singing all dancing, skin healing anti-aging cream from **SkinMedica - TNS Recovery Complex**. The number two physician dispensed cosmeceutical in the US, this product can be credited for Opra's lack of stretch marks and Jen's youthful look 'who need Brad anyway' glow like all superhero's it has a nemesis

Creams rely on the latest cosmetic technology, human growth factors, which are naturally present inside our body. Think of the last time you burnt yourself on the iron. It stings, its annoying, then when you go to show someone your war wound, its gone. Thanks to growth factors - they hang around waiting to stimulate cells, helping your skin to heal. SkinMedica have simply replaced the wound with a wrinkle, and your body's natural growth factors with a external sourced variety. Where could you possibly get these guys from? you ask. Enter our superhero's slightly less glamorous sidekick - a human foreskin. What! Thats sick! I hear you scream. But let me explain. The founder of SkinMedica TNS Recovery Complex

Dr Richard E Fitzpatrick, a pioneer of laser resurfacing, was looking for a cream to help heal the skin. He discovered a by-product of growing skin grafts, a fluid no one thought had any use, contained human growth factors-perfect for healing.

So where does the foreskin come into things? Well, to start the process, Dr Fitzpatrick needed skin, preferably from a baby, as young skin is higher in growth factors and nutrients. Not many women will let you near there pride and joy with a scalpel through- unless its for a circumcision (extremely common in US). For Dr Fitzpatrick, this disposable derma was gold dust-not least because skin on the penis is less likely to be damaged by stress or the environment.

Dr Fitzpatrick took his donated foreskin and created millions of cells. In tests these cells show a huge improvement of collagen production (up to 34%), resulting in a younger plumper looking skin. He figured, if the cream could help healing, it could help aging skin too. So SkinMedica's TNS Recovery Complex was born, even gaining Bo Derek's endorsement.

Growth Factors are naturally present inside our body keeping us young and beautiful.
